David Ogunbanjo

Baltimore, MD | 443-985-8675 | davidogunbanjo15@gmail.com
GitHub: github.com/DeReals | **LinkedIn:** david-ogunbanjo | **Portfolio:** portfolio-ruddy-eight.vercel.app

Professional Summary

Computer Science student specializing in full-stack software engineering and applied machine learning. Proficient in building production-grade web applications (TypeScript, React, Next.js, PostgreSQL) and end-to-end ML pipelines (Python, TensorFlow) with a CNN research model reaching **92% accuracy** and workflow automation delivering **40% efficiency gains**. Seeking opportunities in software engineering, cloud technologies, cybersecurity, and technical product support; pursuing CompTIA Network+ and Security+.

Education

Loyola University Maryland — Baltimore, MD
Bachelor of Science in Computer Science — *Expected May 2027*
– Loyola Presidential Scholarship | Hyman Science Scholar | Haig Scholar | Hauber Research Fellow

Technical Skills

Languages: Java, Python, C/C++, TypeScript, JavaScript, SQL
Backend & Data: Node.js, Flask, FastAPI, PostgreSQL, Supabase
DevOps & Tools: Git, Docker, Linux, CI/CD, Vercel, Netlify
Frontend: React, Next.js, Tailwind CSS, Material-UI, Recharts
ML & Analytics: TensorFlow, pandas, NumPy, OpenCV, Roboflow
Practices: OOP, Data Structures & Algorithms, REST, Agile

Key Projects

Ledger: Personal Finance Platform | *Next.js, React, TypeScript, PostgreSQL, Supabase* — Jun 2025 – Present
– Building a full-stack finance platform **solo** database schema design, Supabase JWT authentication with **row-level security**, and a dashboard-driven React frontend for accounts, transactions, and savings goals.
– Engineered interactive spending and cash-flow visualizations with Recharts, plus budgeting tools and a transaction tracker over a secure, authenticated data layer.

Pothole Detection System | *Python, TensorFlow, CNN, OpenCV, Roboflow* — Jan 2025 – May 2025
– Trained a CNN on 5,000 labeled roadway images achieving **92% detection accuracy**; cut training time **25%** through OpenCV and Roboflow preprocessing optimization.

CompTIA Security+ Study Platform | *React, JavaScript, CSS* — Jan 2025 – Mar 2025
– Built an interactive study app with flashcards, quizzes, and a practice exam engine covering all Security+ domains, with persistent progress tracking via localStorage.

Research Experience

Hauber Research Fellow: AI/ML Research — May 2025 – Aug 2025
Loyola University Maryland — *Baltimore, MD*
– Designed and trained CNN models for pothole detection, achieving **92% accuracy** on a 5,000-image labeled dataset; built the end-to-end ML pipeline (ingestion, training, evaluation) in Python and TensorFlow.
– Prepared findings on model precision, recall, and F1 scores for peer-reviewed academic publication.

Professional Experience

IT Technical Services Assistant — May 2024 – Present
Loyola University Maryland — *Baltimore, MD*
– Provisioned OS and enterprise software across **90% of campus devices**, supporting 3,000+ users; cut average ticket resolution time **20%** via systematic documentation.

Technical Coordinator — Jun 2023 – May 2024
Carroll County Government — *Westminster, MD*
– Architected a Power Apps solution automating temperature-tracking workflows, improving team efficiency **40%**; eliminated redundant data entry across 3 departments via SharePoint and Excel optimization.

Information Technology Intern — Jun 2023 – Aug 2023
Carroll County Government — *Westminster, MD*
– Developed a Power Apps data-tracking application serving **20+ daily users**; launched a SharePoint intranet reducing document retrieval time **35%** for 50+ employees.

Certifications & Leadership

Certifications: CompTIA A+ | CompTIA Network+ (in progress) | CompTIA Security+ (in progress) | CPR Certified

Co-President, ACM & Cybersecurity Club: Led 50+ member organization; organized 10+ technical workshops and hackathons per semester; grew membership **30%** year-over-year.

Vice President, Robotics Club: Coordinate cross-functional project teams and external STEM outreach partnerships.
