

David Ogunbanjo

Software Engineer

Baltimore, MD | 443-985-8675 | davidogunbanjo15@gmail.com | linkedin.com/in/davidogunbanjo | github.com/davidogunbanjo

SUMMARY

Computer Science student with experience in software engineering, machine learning, and IT systems administration. Built production ML pipelines achieving 92% accuracy; automated workflows improving team efficiency by 40%. Technically proficient problem solver seeking a software engineering role. Actively pursuing CompTIA Network+ and Security+.

EDUCATION

Loyola University Maryland

Bachelor of Science in Computer Science

- Awards: Loyola Presidential Scholarship, Delegate Scholarship
- Programs: Hyman Science Scholar, Haig Scholar, Hauber Research Fellow
- Coursework: Data Structures & Algorithms, Operating Systems, Stochastic Processes, Programming Languages

Baltimore, MD

Expected May 2027

RESEARCH EXPERIENCE

Hauber Research Fellow – AI/ML Research

Loyola University Maryland

- Designed and trained CNN models for pothole detection, achieving 92% accuracy on a 5,000-image labeled dataset.
- Built end-to-end ML pipeline using Python, TensorFlow, and Roboflow covering data ingestion, training, and evaluation.
- Prepared findings on model precision, recall, and F1 scores for peer-reviewed academic publication.

May 2025 – Aug 2025

Baltimore, MD

WORK EXPERIENCE

IT Technical Services Assistant

Loyola University Maryland

- Provisioned OS and enterprise software across 90% of campus devices, supporting 3,000+ users.
- Diagnosed hardware and network issues; reduced average ticket resolution time by 20% via systematic documentation.

May 2024 – Present

Baltimore, MD

Technical Coordinator

Carroll County Government

- Architected a Power Apps solution to automate temperature tracking workflows, improving team efficiency by 40%.
- Optimized SharePoint and Excel data management systems, eliminating redundant entry across 3 departments.

Jun 2023 – May 2024

Westminster, MD

Information Technology Intern

Carroll County Government

- Developed a Power Apps data-tracking application serving 20+ daily active users, replacing manual spreadsheets.
- Launched a SharePoint intranet site, reducing document retrieval time by 35% for 50+ employees.

Jun 2023 – Aug 2023

Westminster, MD

LEADERSHIP EXPERIENCE

Association for Computing Machinery and Cybersecurity Club

Co-President

- Led 50+ member organization; organized 10+ technical workshops, hackathons, and networking events per semester.
- Grew club membership by 30% year-over-year through sponsorships and faculty partnerships.

Aug 2024 – Present

Loyola University Maryland

Robotics Club

Vice President

- Coordinate cross-functional project teams and external STEM outreach partnerships.

Aug 2024 – Present

Loyola University Maryland

PROJECTS

Pothole Detection System

Python, TensorFlow, Roboflow, CNN, OpenCV

- Trained a CNN on 5,000 labeled roadway images, achieving 92% detection accuracy.
- Reduced training time by 25% via OpenCV and Roboflow preprocessing optimization.

Jan 2025 – May 2025

CompTIA Security+ Study Platform

React, JavaScript, CSS

- Built an interactive web app with flashcards, quizzes, and a practice exam engine covering all Security+ domains.
- Implemented persistent progress tracking using localStorage.

Jan 2025 – Mar 2025

Personal Portfolio Website

React, Material-UI, Netlify

- Designed and deployed a fully responsive portfolio site with Netlify CI/CD integration.

Aug 2024 – Dec 2024

TECHNICAL SKILLS

Languages: Java, Python, C, C++, SQL, JavaScript, HTML, CSS, LaTeX

Frameworks & Libraries: React, Node.js, Flask, FastAPI, Material-UI, pandas, NumPy, TensorFlow

Concepts & Tools: Object-Oriented Programming (OOP), Data Structures, REST APIs, Linux, Git, Docker, CI/CD

Certifications: CompTIA A+, CompTIA Network+ (in progress), CompTIA Security+ (in progress), CPR Certified
